Supporting Indigenous Business

Supporting Indigenous Australia

Safeman Australia acknowledge and respect Aboriginal and Torres Strait Islander people as the First Nations' People of Australia, the Traditional Owners and Custodians of the land and sea. We honour their rich and diverse culture and look forward to contributing to reconciliation in a collaborative and outcome focused approach.

Our Partnerships

We aim to develop and sustain culturally respectful relationships by successfully engaging with Indigenous businesses to generate positive flow on benefits for Aboriginal individuals and communities around Australia. Our current partnerships with **Countryman Safety** and **Your Safety Factory** have proven great success in achieving culturally respectful relationships towards our business and our environment.

Countryman Safety is an independent majority owned indigenous safety specialist company. Managing director & company founder Lawrence Hillary is a Yamatji man from Nanda language group in the Mid-West of Western Australia. Countryman Safety has evolved into a full service Workwear & Safety business with Australia wide service capability.

Safeman Australia is proudly supporting Countryman Safety and shares the vision to make Countryman Safety, Australia's leading indigenous safety supplier with a goal of providing benefits for Aboriginal individuals and communities.

Your Safety Factory is an independent 100% indigenous owned importer & wholesaler of PPE safety equipment. Safeman Australia is proud to distribute YSF products knowing that the benefits of supporting Indigenous businesses will have a positive flow on effect for Indigenous business owners and their communities.

Supply Nation

Both, Your Safety Factory and Countryman Safety are Supply Nation Certified. This certification is a Nationally recognized accreditation and is a baseline requirement for Indigenous companies supplying goods and services under the Indigenous Procurement Policy.

How to measure:

Neck: Measure around neck, allowing room for two fingers behind tape.

Chest/Bust: Measure around chest, make sure tape is level at the back. A firm chest measurement should be taken.

Waist: Make sure the trousers are sitting comfortably, and measure over the waistband of the trousers.

Hips: (Ladies workwear only) Measure around the fullest part of hips, make sure tape is level.

Inside leg: (Mens workwear only) Measure from the crotch to the top of the heel of the shoe.

GLOVE STANDARDS

Glove standards are used to assess glove performance and ratings are printed on gloves to assist in the selection process. Australian glove standards are detailed in AS/NZS 2161, these are largely adopted from the relevant European standards. EN388 (Mechanical Protection), EN407 (Heat Protection), EN374 (Chemical protection), EN511 (Cold Protection) & EN421 (Radioactive contamination)

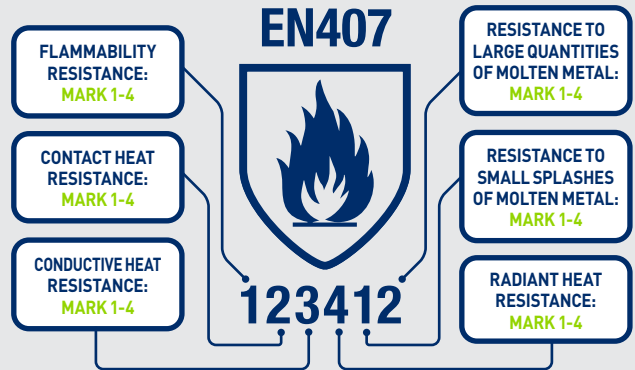

European standards are regarded the bench mark for glove performance globally and in Australia.

The most common standard is EN388 (Protection against mechanical risk), please see below marking details:

EN388:2016 Protection against mechanical risks:

EN407:2004 Protection against Thermal risk (heat & fire):

REVISED STANDARD

In 2016 major changes were adopted mainly to cut resistance and impact protection testing.

The traditional EN388 coup test was retained with an allowance to mark the glove with an X where the test is not done or where the blade was found to be blunted and not able to give a reliable result.

In addition, ISO 13997 TDM test has been included being an alternative test method to give a rating between A-F, X will be marked if this test is not completed.

Please see below technical details for alternative tests:

EN388:2016 CUT TESTS EXPLAINED

NEW CUT TEST ISO 13997 TDM Method

The new ISO 13997 Testing Standard adds an additional letter at the end of the EN 388 number designation, that more precisely defines Cut Resistance in Newton units.

Example:

Score	Score	Score
P		
Pass	Fail	Not Tested

EN Coup cut resistance in Index value

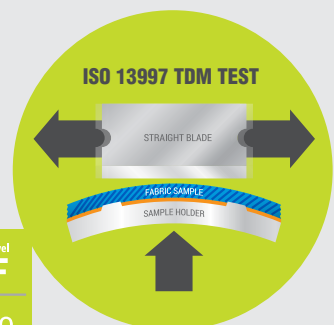

Level	Level	Level	Level	Level
1	2	3	4	5
1.2	2.5	5	10	20

ALUMINIUM CYLINDER LOCKERS

- The "No Rust" Solution
- 12 Modular Styles to select from
- These Aluminium Cylinder Lockers are manufactured to comply with AS 4332 - 2004.
- For the safe storage and handling of Gases in Cylinders.

Cylinder Lockers offer superior features that make these units extremely durable and easy-to-use.

Constructed of 100% welded aluminium they will not rust, corrode or discolour. The expanded 7 mm thick metal panels are the strongest in the industry, offering additional resistance to tampering. Welded security lug on front panel door accepts a padlock (not included) for extra security. Heavier gauge aluminium mesh and extruded (not bent) frame adds rigidity. All models have an exclusive solid aluminium roof panel that slants toward the back to shed water and ice.
